We, the undersigned, call on the State Government not to introduce ambulance fees, but to introduce an ambulance levy. We prefer a system that is equitable, cost effective, and that will deliver a state of the art ambulance service.

We believe that it is important to correctly fund the ambulance service to ensure that Tasmanians get the pre-hospital care that they require in a reasonable timeframe. We also believe that however funds are collected the revenue gained should be applied directly to the Tasmanian Ambulance Service and be in addition to currently budgeted funds for the Ambulance Service.
